

Streaking Fad Yet To Hit South Miami

Susan Stein

From the Halls of South Miami,
To the shores of Crandon Beach
We will streak our naked bodies
On the land and by the sea.

A new fad has struck the country. It is the art of running nude around large crowds and is commonly known as streaking. This fad as yet has not evidently struck the students of South Miami.

It is regrettable that SM's students lack discipline on their part that they do not participate in such healthy activities. What has happened to that good old fashioned spirit of those would-be-streakers.

Streaking is certainly a change in stride from a watering

Watergate and the massive riots of the 60's to a more humorous and comical attraction of the 70's. Certainly such actions by the young of America will bring back the hope and belief that we may put faith in our young to ~~make the most of the situation.~~

But of course there are two sides to every story. Some may find streaking to be revolting and in bad taste and still others may find it quite amusing. By my observations, I found that more guys admitted they would seriously consider streaking than would the chics. But, still very few of those questioned actually did streak.

To streak or not to streak,
that is the question.
